HOW TO UPDATE OKTA VERIFY TO A NEW MOBILE PHONE

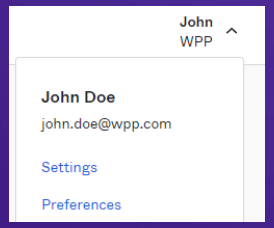
To do this yourself, you will need to complete the steps below before discarding your current mobile phone.

YOU HAVE YOUR CURRENT AND NEW PHONE

STEP 1

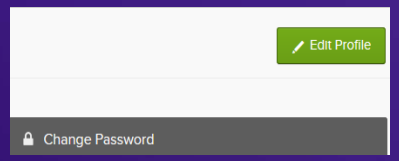
Sign in to **wpp.okta.com** and follow the prompts to log in.

Click on your name (top right corner) and choose '**Settings**'.



STEP 2

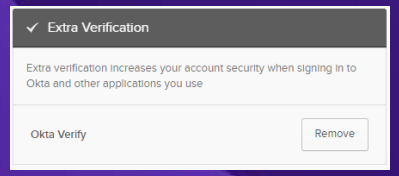
Click on '**Edit Profile**' and enter your password when prompted.



STEP 3

Scroll down to the '**Extra Verification**' section.

Click '**Remove**' to reset the factor relating to your chosen Multi Factor Authentication (MFA) e.g., Okta Verify prompts.



STEP 4

Log out of Okta. The next time you log in, use your new mobile phone when prompted to set up your chosen MFA.

Click on '**Setup**' next to your chosen MFA and follow the prompts.

YOU ONLY HAVE YOUR NEW PHONE

STEP 1

Please contact the service desk and request an 'Okta MFA reset'

Once this is completed by IT, you can log into Okta and enrol your new phone as Multi Factor Authentication.

WANT MORE INFORMATION?

For more information, visit the Okta page on InsideWPP.

For assistance using Okta, please contact the service desk.

OKTA
USER GUIDE

WPP

AGENDA

WHAT IS OKTA?

Single sign-on (SSO) means one set of credentials (username and password) to access multiple WPP Apps, Emails, Teams and more.

WPP's SSO is via Okta uses multi-factor authentication (MFA) to secure your account. MFA means more than one method to prove who you are when signing in.

WHAT WOULD YOU LIKE TO KNOW?

1. How to set up Okta.
2. How to log in to Okta.
3. How to add an application to your Okta dashboard.
4. How to organize your Okta dashboard.
5. How to add a second device to Okta.
6. How to reset your Okta MFA.
7. How to set up and use Self Service Password Reset.
8. How to Unlock & Recover your account.
9. How to use Forgotten Password.
10. How to change your password.

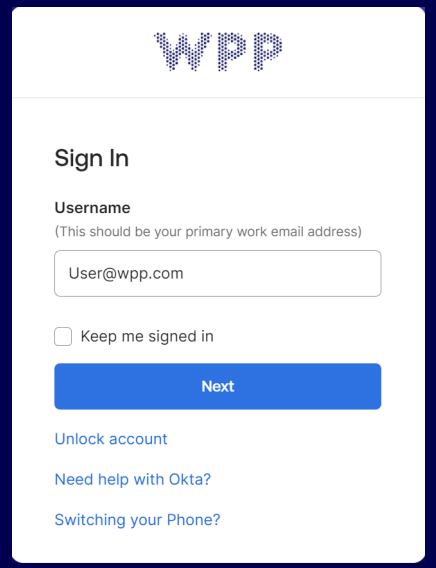
1. HOW TO SET UP OKTA

STEP 1

Go to **wpp.okta.com** in your web browser.

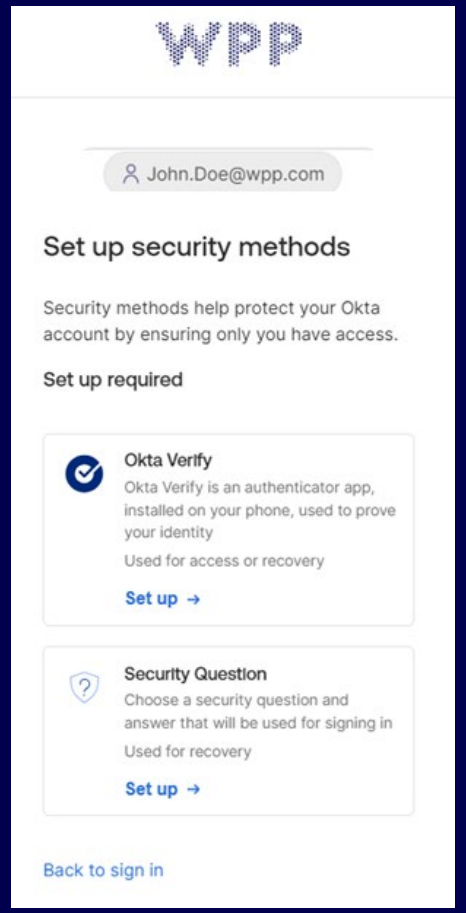
Enter your primary email address. This should be the same email/password that you use to log in to your computer or Outlook.

Please do not attempt to activate more than one email address within Okta.



STEP 2

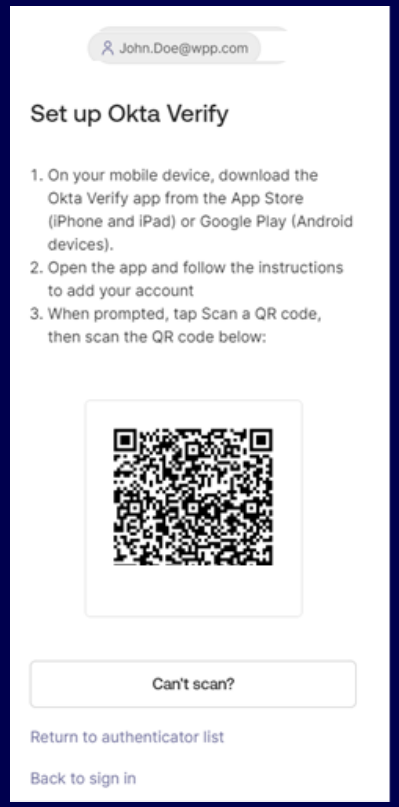
You will be redirected to the setup security methods



STEP 3

Download the 'Okta Verify' app on your mobile device.

Open the app and follow the instructions to add your account.

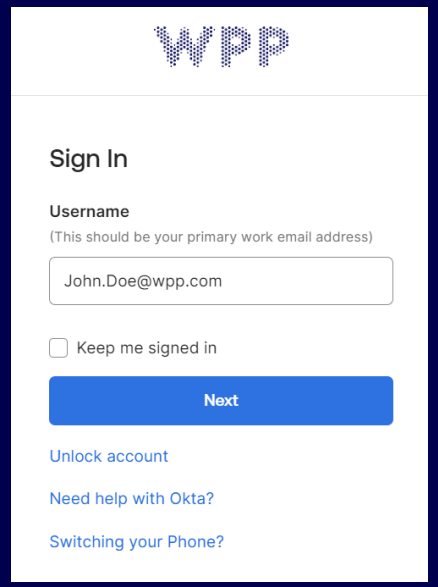


2. HOW TO LOG INTO OKTA

STEP 1

Go to wpp.okta.com in your web browser.

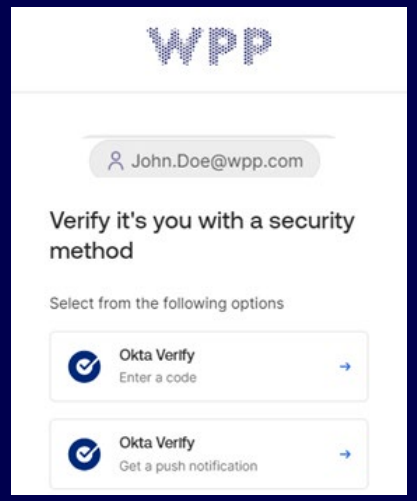
Sign in with your primary email address and password. These should be the same email and password details that you use to log in to your computer or Outlook.



STEP 2

Choose your preferred authentication method.

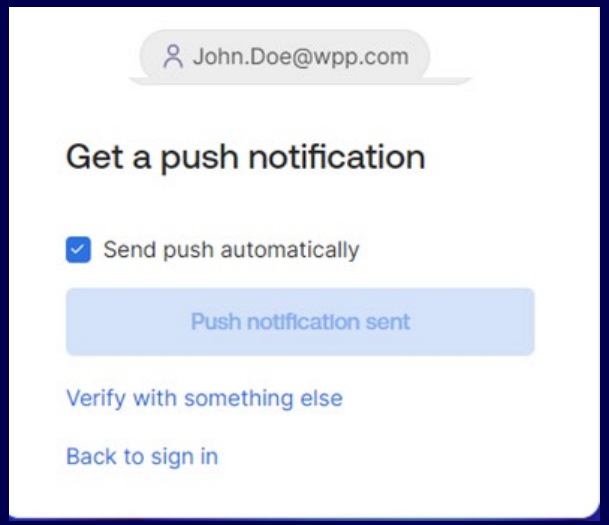
On Activation, select "PUSH NOTIFICATION" and follow instructions. You will setup "Use Okta FastPass" later, in step 5 of this user guide.



STEP 3

In the "get a push notification" option you will receive a push notification on your phone. Select the 'Yes, it's me' option to gain access.

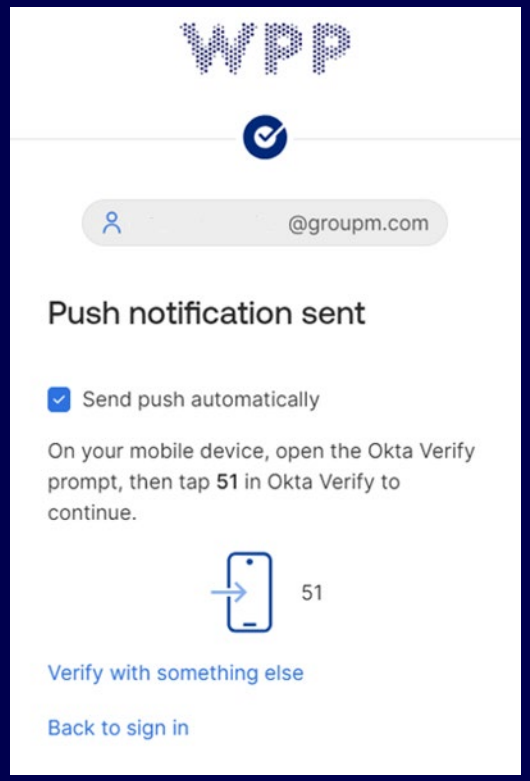
Always select 'No, it's not me' if you did not initiate the login request.



2. HOW TO LOG INTO OKTA

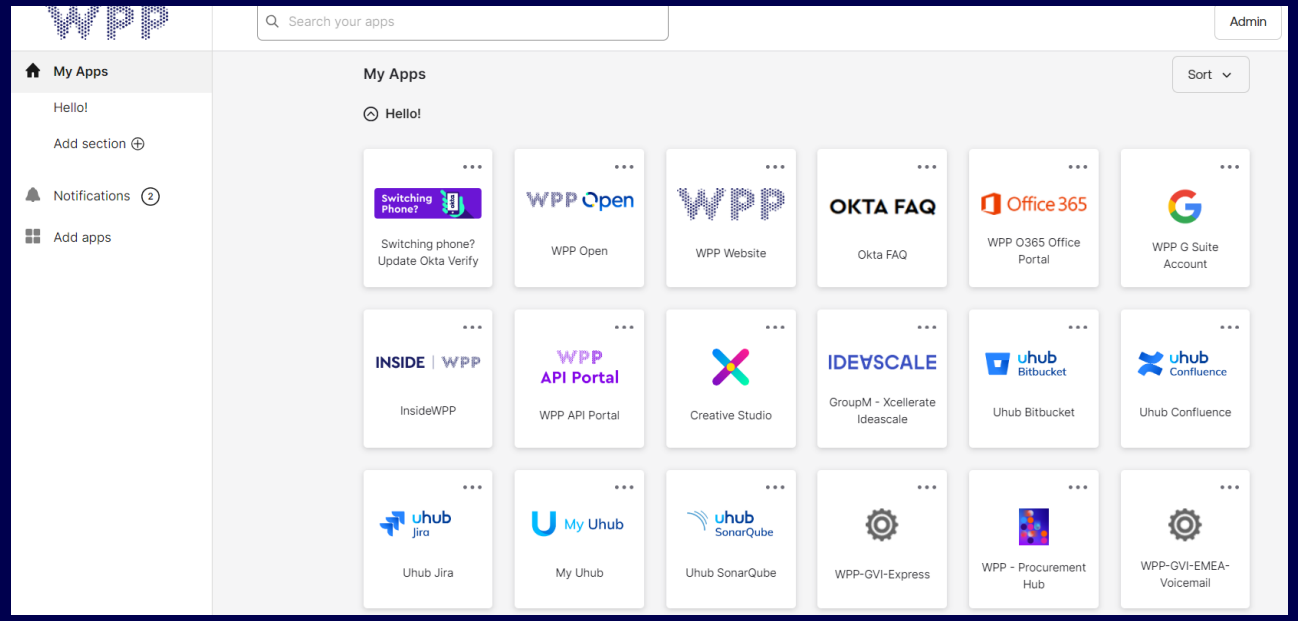
STEP 4

Sometimes, if Okta detects unusual activity or a potential threat, it may ask you to complete a number challenge to secure your account.



STEP 5

Once logged in your dashboard will contain shortcuts to applications you already have access to or can request access to.

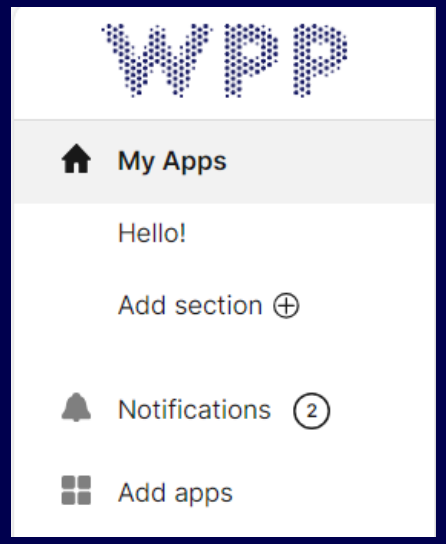


3. HOW TO ADD AN APPLICATION TO YOUR OKTA DASHBOARD

STEP 1

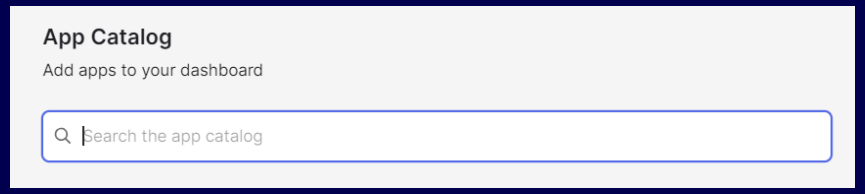
Click on the "Add apps" button on the left of your Okta Dashboard.

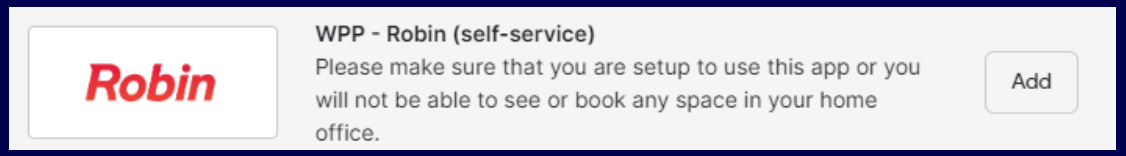
Enter the name of the application you'd like to add in the Search for an app field in the upper left-hand corner of the applications page.



STEP 2

When the application you're looking for appears in the dropdown menu below the search bar, click on the 'Add' button.





STEP 3

The application may require an approval step.

When approval is required, you will see a pop-up allowing you to post the request to the approver(s).

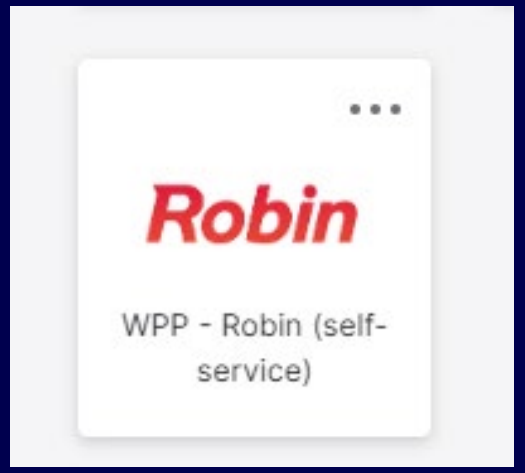
You can enter your reasons for needing the app into the comments box if you think it will be useful.

3. HOW TO ADD AN APPLICATION TO YOUR OKTA DASHBOARD

STEP 4

Click on the "Add apps" button on the left of your Okta Dashboard.

Enter the name of the application you'd like to add in the Search for an app field in the upper left-hand corner of the applications page.

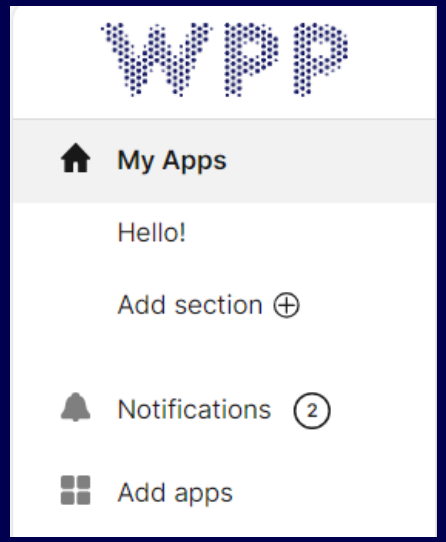


4. ORGANIZE YOUR OKTA DASHBOARDS

CREATING SECTIONS

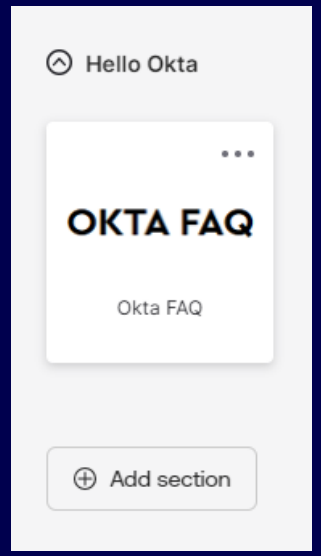
Click on the "Add Section" button on the left of your Okta Dashboard.

Enter the name of the section you'd like to add.



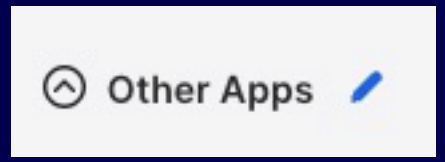
ORGANIZING YOUR APPS INTO SECTIONS

Once you have created a new section, you can drag and drop app tiles to customize your dashboard.



RE-NAMING TABS

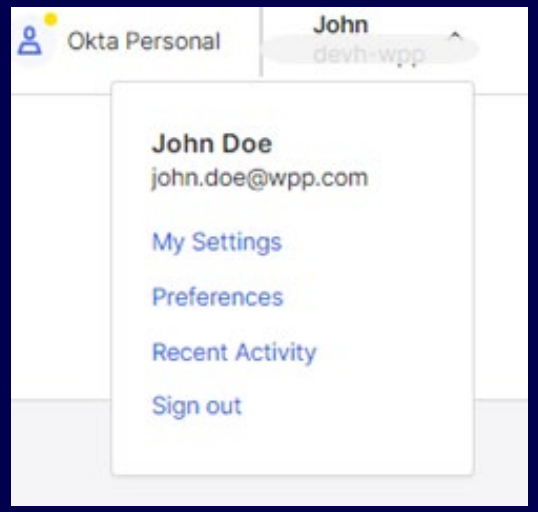
You can rename your sections by clicking on the edit icon next to the existing section name.



5. HOW TO ADD A BACKUP MOBILE PHONE TO OKTA

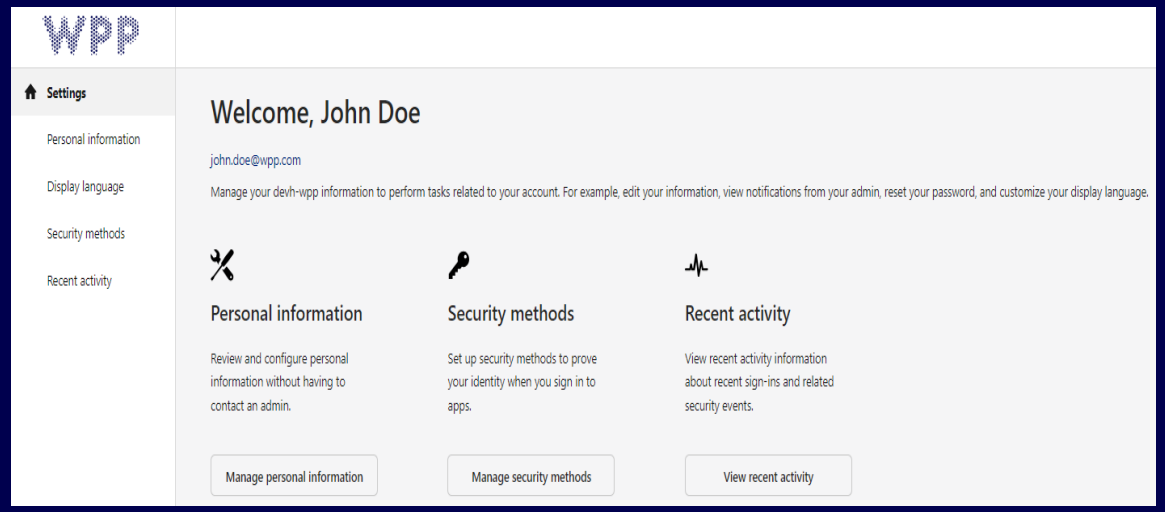
STEP 1

Sign in to wpp.okta.com and Click on your name (top right corner) and choose 'My Settings'.



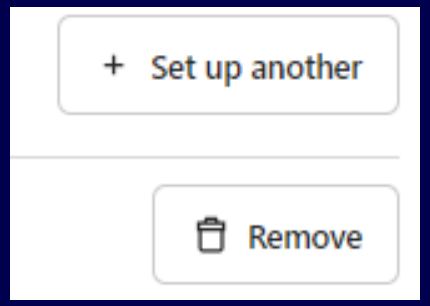
STEP 2

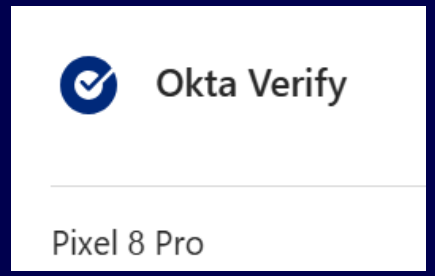
Go to 'Manage security methods' and look for the 'Okta Verify' option



STEP 3

Click 'Set up another' and it will ask you to identify yourself once more

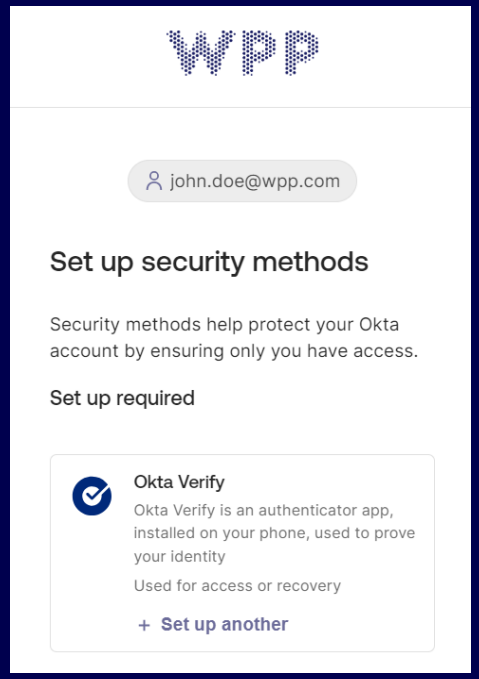




5. HOW TO ADD A BACKUP MOBILE PHONE TO OKTA

STEP 4

Once identified, you will need to set up your other device in 'Okta Verify'.



STEP 5

Open the app in your new device and follow the instructions to add your account.

STEP 6

Once the account has been linked to the device, you will see a message confirming that you have added the account.

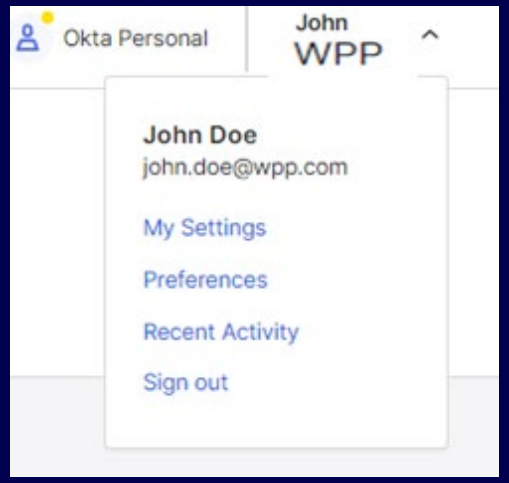
The next time you want to log in to your account, you will be able to choose from the different devices you have linked.

6. HOW TO RESET YOUR MFA WITH YOUR OLD MOBILE PHONE

STEP 1

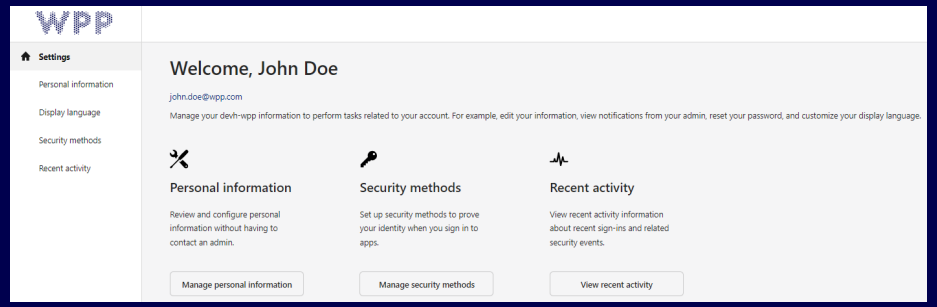
Sign in to wpp.okta.com and follow the prompts to log in to Okta.

Click on your name (top right corner) and choose 'My Settings'.



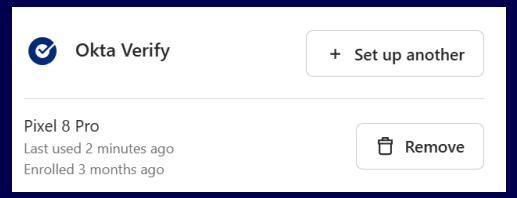
STEP 2

Go to 'Manage security methods' and look for the 'Okta Verify' option



STEP 3

Click 'Remove' to reset the factor relating to your chosen MFA.



IMPORTANT: IF YOU DON'T HAVE YOUR OLD PHONE, please contact the IT helpdesk team and request an 'Okta MFA reset'

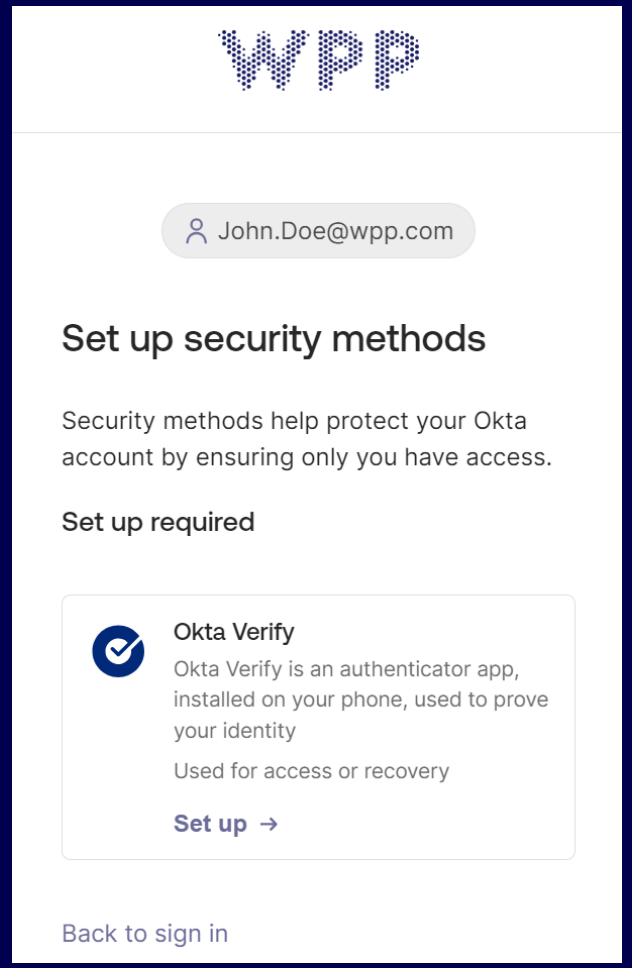
Once this is completed by the support team, you can log into Okta and enroll your new phone as MFA.

6. HOW TO RESET YOUR MFA WITH YOUR OLD MOBILE PHONE

STEP 4

Log out of Okta. The next time you log in, use your new mobile phone when prompted to set up your chosen MFA.

Click on 'Setup' next to your chosen MFA and follow the prompts.

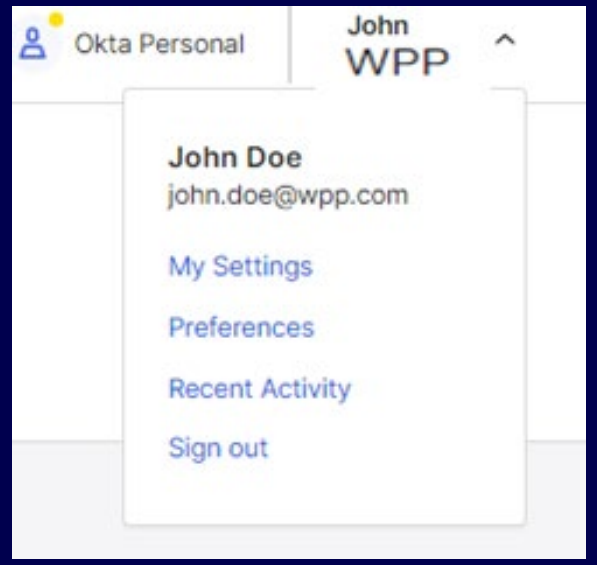


7. SELF SERVICE PASSWORD RECOVERY (SSPR)

STEP 1

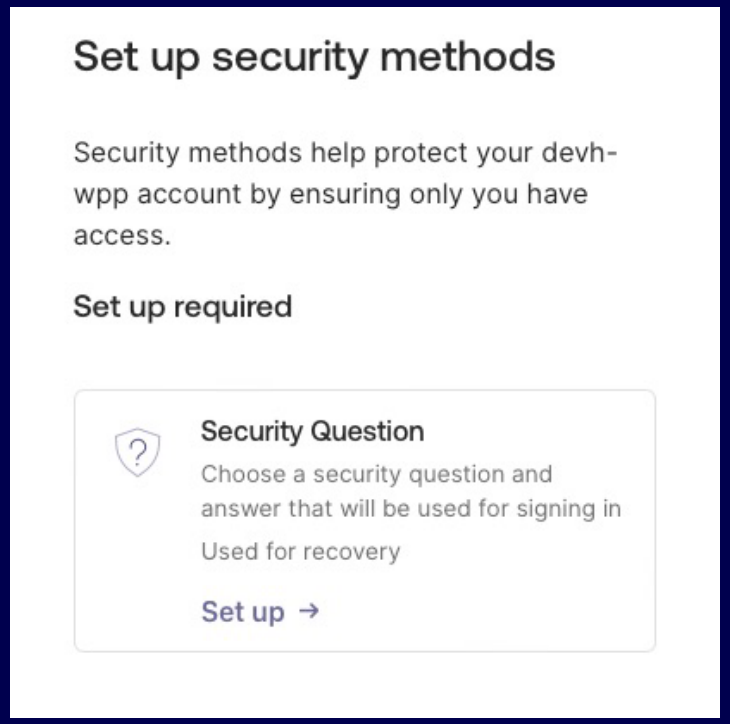
Sign in to wpp.okta.com and follow the prompts to log in to Okta.

Click on your name (top right corner) and choose 'My Settings'.



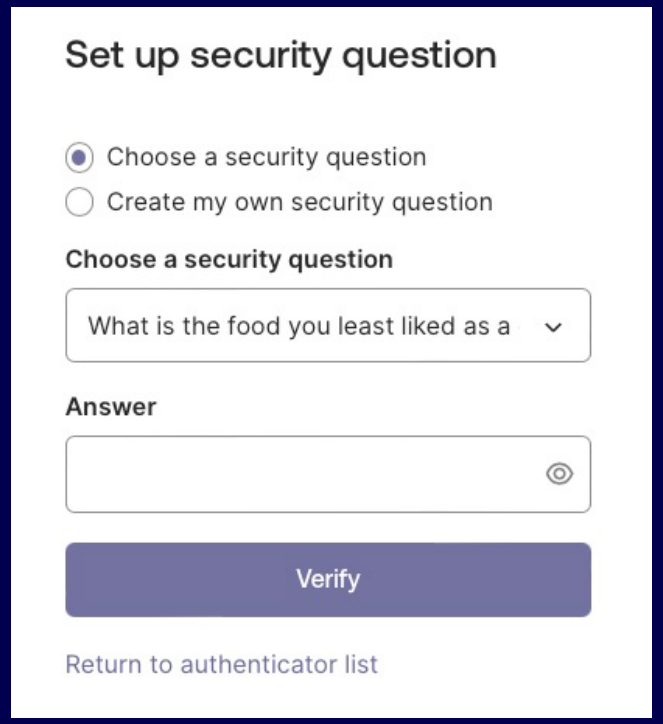
STEP 2

Go to "Security Methods" and look for "Security Question" and click "Set up". You will need to authenticate again.



STEP 3

You will then choose a security question to recover or unlock your account in the future.

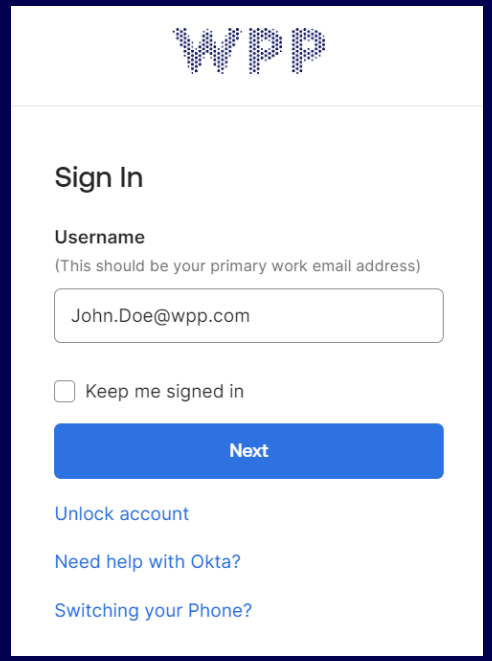


8. HOW TO UNLOCK & RECOVER YOUR ACCOUNT

STEP 1

If your account is locked, go to wpp.okta.com in your web browser and click on the link 'Unlock account'.

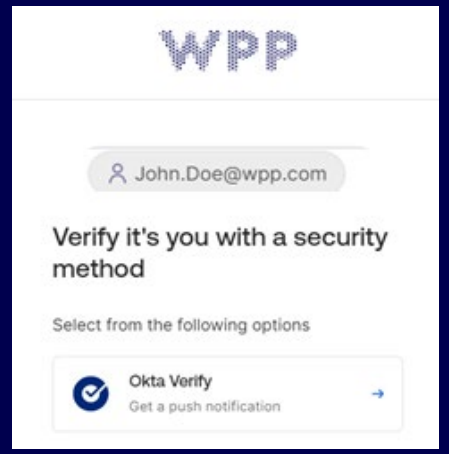
Enter the account you want to unblock.

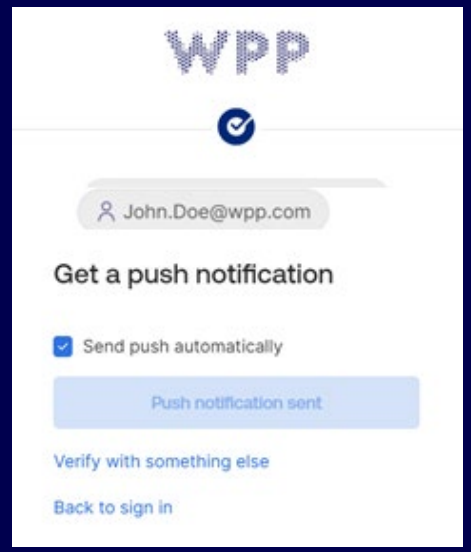


STEP 2

Verify it's you using Okta Verify.

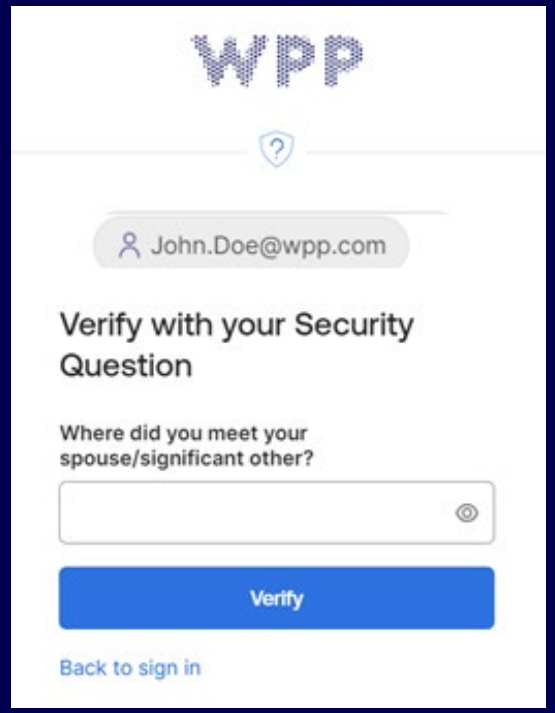
You will get a push notification on your phone.





STEP 3

After the push notification you will have to answer your security question correctly.

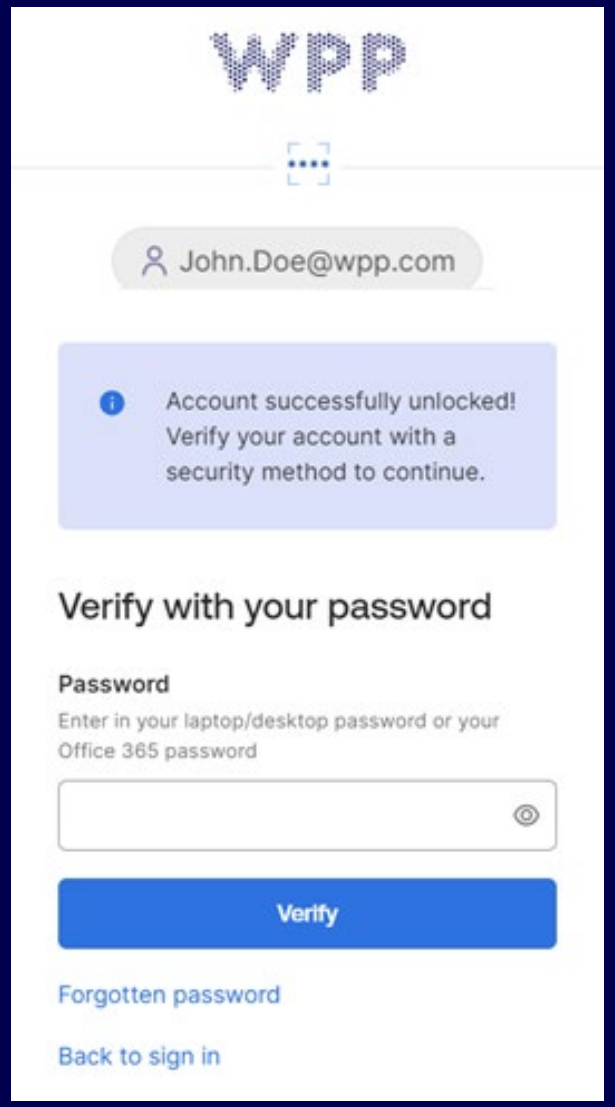


8. HOW TO UNLOCK & RECOVER YOUR ACCOUNT

STEP 4

When you answer the security question correctly you have successfully unlocked your account.

Finally, you will have to insert your password, and you will be able to use your account normally.

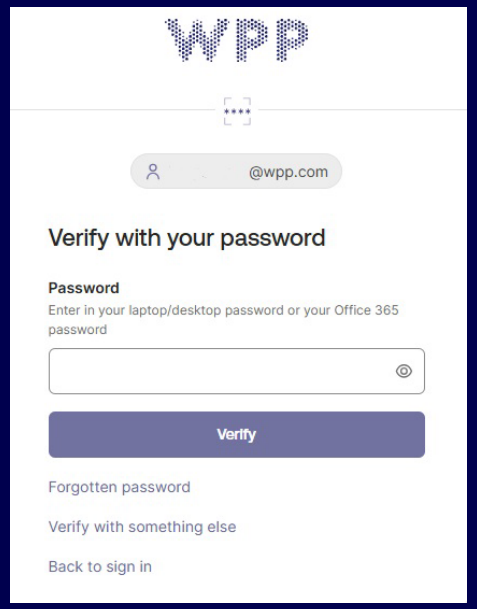


9. HOW TO USE FORGOTTEN PASSWORD

STEP 1

If you have forgotten your password go to wpp.okta.com and enter your email.

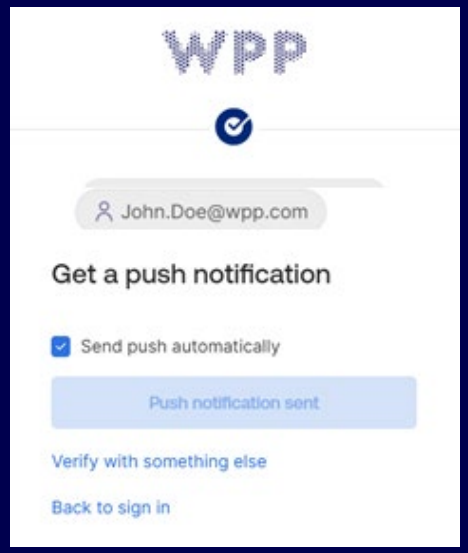
When prompted for the password select Forgotten Password.



STEP 2

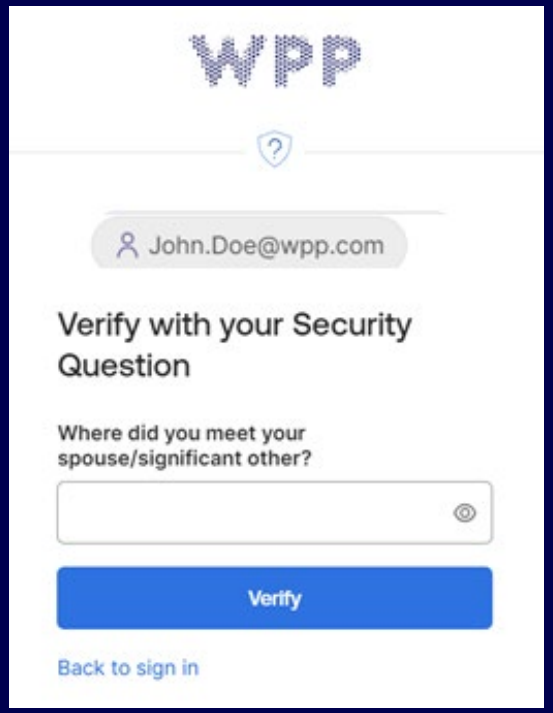
Verify it's you using Okta Verify.

You will get a push notification on your phone.



STEP 3

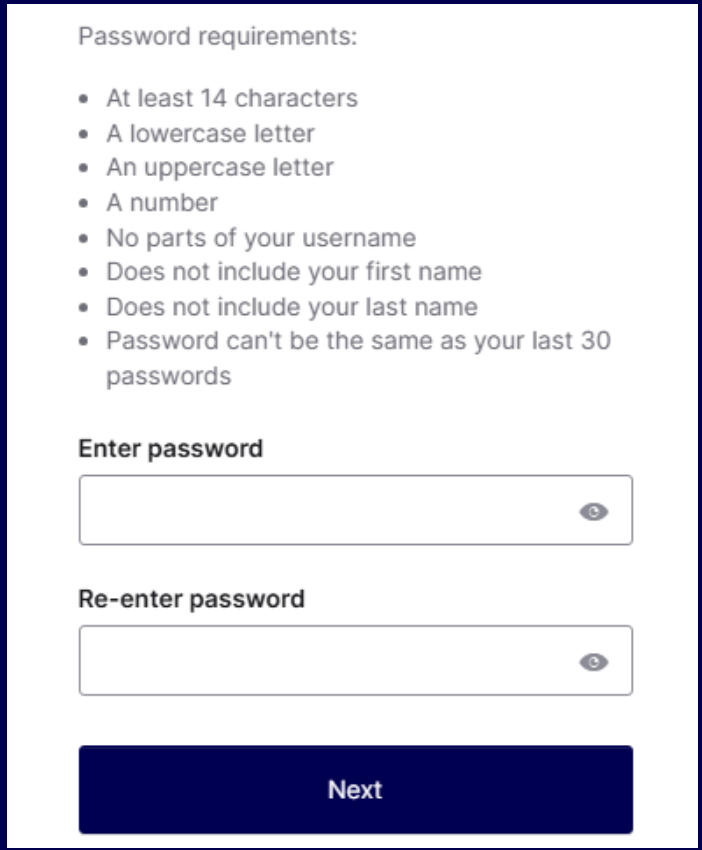
After the push notification you will have to answer your security question correctly.



9. HOW TO USE FORGOTTEN PASSWORD

STEP 4

Choose a new password that meets the listed requirements and click on 'Reset Password'.



10. HOW TO CHANGE YOUR PASSWORD

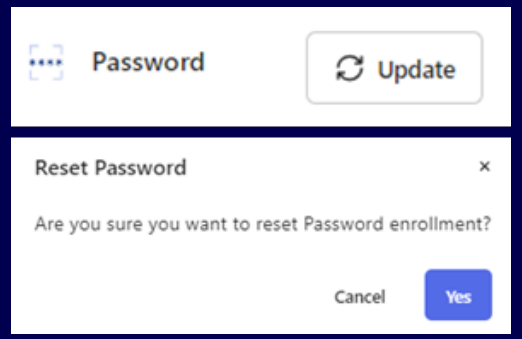
STEP 1

Sign in to wpp.okta.com and follow the prompts to log in to Okta.

Click on your name (top right corner) and choose 'My Settings'.

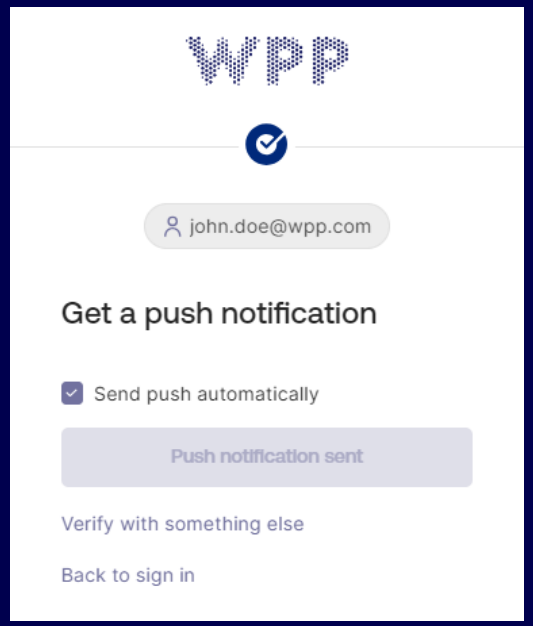
STEP 2

Go to 'Manage security methods' and look for the 'Password' option and click 'Update'



STEP 3

You will get a push notification on your phone to gain to access

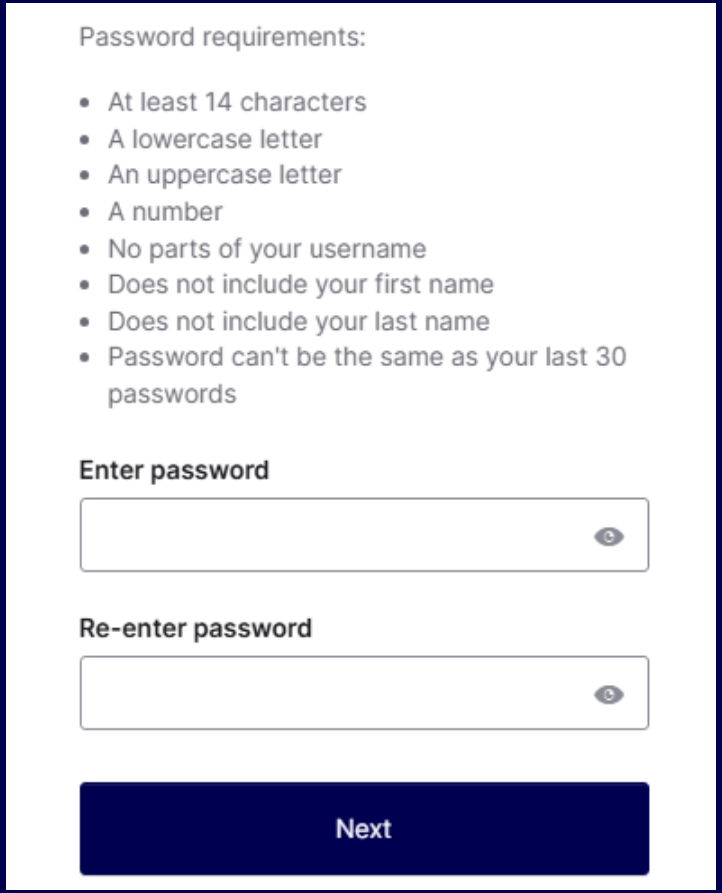


10. HOW TO CHANGE YOUR PASSWORD

STEP 4

Choose a new password that meets the listed requirements and click on 'Reset Password'.

You will be returned to the 'My Settings' section, and you will be able to use the new password.



You may need to use Cisco AnyConnect (VPN), to sync your device's password when working remote.
