Data is encrypted while moving.

19. What is security group?

Firewall for EC2.

20. What is AWS Artifact?

Compliance reports.

21. What is EC2?

Virtual servers.

22. What is S3?

Object storage.

23. What is EBS?

Block storage.

24. What is Lambda?

Serverless compute.

25. What is RDS?

Managed database.

26. What is DynamoDB?

NoSQL database.

27. What is VPC?

Isolated network.

28. What is CloudFront?

Content delivery network.

29. What is Route 53?

DNS service.

30. What is Auto Scaling?

Automatic resource adjustment.

31. What is Load Balancer?

Distributes traffic.

32. What is CloudWatch?

Monitoring service.

33. What is CloudTrail?

Tracks API activity.

34. What is SNS?

Notification service.

35. What is SQS?

Message queue.

36. What is Elastic Beanstalk?

App deployment service.

37. What is EKS?

Kubernetes service.

38. What is ECS?

Container service.

39. What is Lightsail?

Simple VPS.

40. What is Glue?

ETL service.

41. What is pay-as-you-go?

Pay for usage.

42. What is Free Tier?

Limited free usage.

43. What is Cost Explorer?

Analyze costs.

44. What is AWS Budgets?

Set alerts.

45. What is Reserved Instances?

Discounted long-term usage.

46. What is Spot Instances?

Low-cost unused capacity.

47. What is TCO?

Total cost of ownership.

48. What is pricing calculator?

Estimate costs.

49. What is Consolidated Billing?

Combined billing.

50. What is support plan?

Different AWS support levels.
